

Presentation

# Eden Suite System Behaviour

Date

November 2019

# Introduction

---

All software solutions require users to interact in a particular way due to their inherent design or architecture.

This resource summarises general areas of note that will assist users in their use of Eden Suite.

Behaviour specific to a particular function/ screen is outlined in the training content of that function.

# General

---

- Browser version
- Logging on/ off
- Session Expiry
- Refresh & Back Functionality
- Date Pickers

# Browser Version

---

- The two most recent versions of
  - Firefox
  - Google Chrome
  - Safari
  - Microsoft Edge
- Avoid using compatibility mode
- The recommended screen resolution
  - Application width is 1024 x 768

# Logging On

---

- Initial Login will take users to the application
- You can use “right click” to open modules in different windows/tabs
  - Closing one window or tab will not log users out of the other windows/tabs
  - However, using the Logout Button will also log you out of other windows/tabs

# Session Expiry

---

- Users will be logged out of a session after a period of non-use.
- The non-use time is 2 hours
- Note Logging on/off behaviour

# Refresh & Back Functionality

---

## Refresh

- It will be common for a User to have multiple tabs/windows open
- There is no lag for changes/edits made in one windows/tabs being available in another module. Users simply need to refresh the screen for the update to be visible.

## Back

- There is no 'Back' functionality within the solution itself
- Use your browser's Back function instead or use the "bread crumbs"

# Date Pickers

- Whilst there are slight formatting differences in date pickers across the solution, there are two basic approaches:
- Data search and entry requires accuracy to the day, therefore full date selection is required
- General reporting, validity periods are accurate to the month, therefore only month selection is required

**Date Range \***

01/10/2019 to 31/10/2019

Oct 2019

| M  | T  | W  | T  | F  | S  | S  |
|----|----|----|----|----|----|----|
|    | 1  | 2  | 3  | 4  | 5  | 6  |
| 7  | 8  | 9  | 10 | 11 | 12 | 13 |

# Search

- “Auto completers” provide a drop down list of options as you type - maximum of 100 matches
- Can click “Down Button” to see all options (up to 100)
- Disregard to see everything

The screenshot shows a web interface with two search fields. The first field, labeled 'Activity or Activity Group', contains the text 'elec' and has a dropdown menu open. The dropdown menu lists four options: 'Cogen Electricity', 'Electricity', 'Electricity T&D', and 'Green Power Electricity'. Each option is followed by the text 'Activity in Stationary Energy'. The 'Electricity' option is highlighted with a red background. To the right of the first field is a second field labeled 'Supplier' which is currently empty.

| Activity or Activity Group                               | Supplier |
|----------------------------------------------------------|----------|
| elec                                                     |          |
| Cogen Electricity<br>Activity in Stationary Energy       |          |
| <b>Electricity</b><br>Activity in Stationary Energy      |          |
| Electricity T&D<br>Activity in Stationary Energy         |          |
| Green Power Electricity<br>Activity in Stationary Energy |          |

# Bookmarking

---

- The application's design enables you to bookmark most pages
  - Includes search results
  - Can be emailed (to authorised users)

# Questions
